

My Summer Time

Class-VII

Session -2024-25

Earth is our beautiful and precious home. The overwhelming majority of the Environmentalists are of the opinion that man-made climate change is a reality. It's a fact that seas climbing our shores, devastating floods, droughts etc., have become more frequent facts of life. We are beginning to understand that seasons are changing beyond recognition and its dangerous consequences are affecting our health. It is our moral responsibility to address this crisis at the earliest.

As a part of experiential learning, art-integrated education creates joyful learning and imbibing the Indian ethos. We have drawn attention to the effects of climate change on indigenous tribes of India.

The Andaman and Nicobar Islands are often pictured as a lush, tropical tourist paradise. However they are at extreme risk of becoming uninhabitable because of rising sea levels. The effects of climate change on the Lakshadweep and Andaman and Nicobar Islands are diverse and impactful.

Investigate the evolving climate condition of the Lakshadweep Islands and Andaman and Nicobar Islands depicting the effect of climate change on its indigenous tribes representing the ode of rich cultural heritage and diversity of our ancient civilization.

EXTINCT TRIBES OF ANDAMAN AND NICOBAR ISLANDS OR LAKSHADWEEP ISLANDS

Under the aegis of 17 Sustainable Development goals proposed by the UN Department of Economic and Social Affairs, let's explore together the communities and tribes of India.

A tribe is a social division in a traditional society consisting of families linked by social, economic, religious or blood ties, with a common culture and dialect. A tribe possesses certain qualities and characteristics that make it a unique cultural, social and political entity. Tribes are also known by the name 'Adivasis' in India. There are around 645 distinct tribes in India with different languages and traditions ,not only surviving but thriving . Some of these tribes are khasi, Bhil, Gaddis, Santhal, Garo, Gonds, Warli and many more.

1. You are a tourist guide. Prepare a **multimedia presentation** educating the tourists about the need of environmental protection of the Lakshadweep Islands and Andaman and Nicobar Islands. Also, include details on eco-friendly infrastructure, community-based initiatives, and awareness campaigns on preventing dangers caused by climatic changes.

2. Compare the climate of the islands of Andaman Nicobar to the climate of Delhi using a 3-D bar graph. Is there any difference between the climates of these two places? Explain your answer briefly.

Climate change is one of the major factors of extinction of indigenous tribes of these islands. Various health and environmental problems are arising out of harmful effects of climate change. Enlist the reasons for the extinction of these tribes due to this climate change. Highlight the consequences of their extinction. Also mention the strategies adopted by the Indian Government for the preservation of these tribes and to fight against climate change.

3. फल और सब्जियां देने वाले पेड़ अब नहीं रहे। इससे उस क्षेत्र में रहने वाली जनजातियों के मुख्य आहार में असंतुलन पैदा हो जाता है और कभी-कभी भुखमरी की स्थिति भी पैदा हो जाती है। इन द्वीपों के विलुप्त और कमजोर वृक्षारोपण को सूचीबद्ध करें और अपने निष्कर्षों को एक फ्लिप बुक में प्रस्तुत करें

4. Make a collage on the indigenous species of Flora & Fauna of Lakshadweep islands " and write their names in French.

5. Sanskrit-

भूमंडलीय ऊष्मीकरण और जलवायु के इस परिवर्तन को कम करने के उपाय और आपका योगदान, ए 4 साइज शीट पर प्रस्तुत करें.

* एक वृक्ष लगाएँ।
