

# QUEEN MARY'S SCHOOL, NORTHEND

## HIGHLIGHTS JULY 2023

Dear Parents & Students

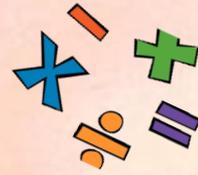

Welcome back after the refreshing vacation. Let us take blessings from Almighty and start afresh with new energies to learn new things. We take pride in being a school of choice and look forward to challenging the young minds to make them realize their full potential.

Queen Mary's family steps forward in the name of Lord and serve the girl child with love and tender care. We stand affirm in our belief - **'By Love Serve One Another'**.

# Maths Month Activities

1<sup>st</sup> July to 31<sup>st</sup> July'2023

The month of July was observed as Maths month. Different interesting activities were planned to inculcate the joyful techniques of learning Mathematics. The activities aimed at encouraging children to notice Mathematics outside their classroom. These activities were integrated with EVS and Art & Craft while celebrating World Environment Day. A feeling of sensitivity and care towards the animals was the focal point of discussion in classroom. The children thoroughly enjoyed the activities as they also provided an element of wonder to them.

Class	Activity
I	Worksheet -Create Marine Life with Numbers.
II	Worksheet- Shapes and Our Environment
III	
IV	Aryabhata Maths Inter House Quiz Competition
V	

# Emblazon-Talent Fair 2023 -

## A Myriad of Inter-School Events

26<sup>th</sup> July'2023 - An Inter-School event, Talent Fair hosted each year by our school. Students from various prestigious schools participate in an array of events to showcase their talents in various fields. The event is organised to celebrate togetherness which truly resonates with our school motto 'By Love Serve One Another'. This year too various events were organised, glimpses of which are as follows-

**CALL TO ACTION** – In this event the participants from class V created a self-made product and advertised for it through a jingle recitation. The event served as an inspiring platform for young minds to raise their voices for a sustainable future.

**MATH-e-MAGIC** – This event was organised to arouse the inquisitiveness in children to learn Mathematics in interesting ways. Students used Vedic Mathematics, Abacus, Calendar tricks, Dice based tricks, Rubic's Cube, Deck of Cards etc. to explain easy techniques of problem solving. All the students participated with great zeal and enthusiasm.

**A TRAVEL TALE** – In this event the participants from class IV promoted tourism of any one state or union territory of India by appreciating their unique features like location, cuisines, famous places etc. through a creative jingle and props. The event aimed to motivate the audiences to appreciate the diversity of these places.

**CBSE Storytelling Competition:** Queen Mary's School, Northend, Model Town, feels proud to share that **Mihika Mitruka** student of class IV D received the **certificate of merit in CBSE Storytelling competition 2023-24.**

**1.7.23- Continuing Professional Development:** The workshop was organised in school on the topic **Reflections and Vision Setting**. The resource person *MS. Tamanna*, talked about communication and team work. The workshop focused on how we can learn from our past and step into the future. The workshop made educators retrospect about the issues they faced in the past and find appropriate solution for them. The workshop was highly engaging and essential as it made educators reflect on their actions and consequences.

*Teaching is more than imparting knowledge;  
it is inspiring change. Learning is more than absorbing facts;  
it is acquiring understanding.*

- William Arthur Ward
