

CLASS - VIII

Summer Break Activities 2018-19

Summer break are the best ways to rejuvenate ourselves. They also give us time to explore constructive and creative ideas. It is a time where leisure activities undertaken give a new lease of life. Learning by doing can be aptly practised during this time!

Being aware of our environment is crucial part of improving our lives. We now recognise that we can influence our health and living by making life style changes.

World Environment Day is celebrated on 5th June every year. You are suggested to ponder on the following points:

Recycle, reduce and reuse plastic products in daily life. Stop excessive use of plastic bottles, wrappers packaging materials etc. Use alternative biodegradable products and help in keeping your surroundings clean.

It's a wonderful time of year to get together with friends and family to celebrate and be thankful for all of the wonderful people in our lives.

Let us help to revive each other and do our best to utilize the summer vacations wisely.

*Wishing you a happy summer break.
Stay Blessed*

Educators of Class VIII

*I search for forest and see only a few trees,
I barely see an animal. Oh tell me, please!
Where is the beauty, where did it all go?
I asked many but no one seems to know.
Yet, I know, that we are to blame.
We have brought mankind to horrid shame.
We killed living beings for our own gain,
We took away their homes, gave them so much pain.
It is time for redemption, to set things right.
Enough for ourselves, for them we must fight.
Protect their kind, they help us to live.
We have taken enough, now it is time to give.*

“Wildlife Expedition”

Wildlife plays an important role in balancing the environment and providing stability to different natural process of our planet.

Each state has its peculiar wildlife species associated with it.

- *Identify and acknowledge the state bird and animal of different states of India.*
- *Mention their current status – Extinct/ vulnerable/ endangered*
- *Suggest measures to safeguard vulnerable or endangered species so that they do not become extinct.*
